Data Center and Security

Unique Frequency

Design for governmental and public sector

TETRA portable and mobile radios terminal

The radios products deliver powerful audio, enhanced coverage, extended battery life, greater ruggedness, advanced ergonomics and increased usability, so personnel working in the most extreme environments have the ability to work safer, work smarter and work anywhere. The radios has been specifically designed for end-users who work in areas with potentially explosive gases or chemical vapours, flammable liquids or combustible dust. These radios are highly flexible and capable system radio which permits the installation of multiple control heads.

TWO-WAY, DURABLE & RELIABLE RADIOS

Base Station

Our solutions not only help expand the communication range of two-way radio systems, but it also serves as a base station for convenient, easy fleet communications in public safety, industrial or administrative work areas. The compact Base Station sets new standards for high capacity, high redundancy base stations while ensuring site acquisition and installation costs are as low as possible. Reduced site acquisition costs through less antenna site requirements, reduced installation costs due to more compact and flexible design and reduced site operation costs through less site visits and lower maintenance. Base Station provides a flexible path for the addition of LTE to complement a TETRA system. Our base station solutions and products based on Motorola Solutions quality.

Business productivity and public safe communication

The frequency and sophistication of cyber attacks
Smart public safety solution
